## CHINA RESEARCH TRIP PRESENTATION

In October 2016, New Oasis hosted a research trip to China with six teachers from our partner schools to investigate the Chinese education system and bring back findings that would help inform best practices for working with Chinese students studying in the United States. By helping schools better understand their Chinese students' educational background, New Oasis hopes to provide schools with the tools and knowledge to better support their international students.

Each teacher selected a research topic, conducted pre-trip background reading, and made observations while in China. This spring they will present their research to the New Oasis Community via online webinar. All presentation dates are now finalized. Please see below for detailed information :

PRESENTATION TOPIC	PRESENTER	SUMMARY OF PRESENTATION	PRESENTATION TIME
Through the Looking-Glass, and What Wang Li Found There.	Chris Souther	The differences in educational environments between the US and China with an emphasis on technology.	2/16 at 3:45PM
